Safety

The BADUJET Turbo Light made by SPECK is the entry-level model in the series that allows budget-conscious pool owners to enter the powerful premium range and recreate the ultimate experience of open water swimming! It features the proven technology of the BADUJET Turbo in a compact design, with a directly mounted motor, a through shaft and a mechanical seal that replaces more expensive components without compromising on quality or durability.

Getting started with your swim workouts is now easier than ever - thanks to the lightweight plastic front panel and the intuitive touch and remote control of the three continuously adjustable operating modes. You can store three programmes using either the remote control or the push buttons.

With a maximum flow rate of 200 m³/h and a motor power of just 1.1kW, it is extremely energy efficient and offers casual swimmers, families and new pool owners the ideal environment for learning to swim or for gentle fitness exercises. The water jet angle can be easily adjusted so you can suit it to your favourite swimming style.

Complementary universal technology shaft in polypropylene, tailored to the Jet Turbo series, available as an option.

Saltwater

The perfect choice to bring oceanic feeling to your pool with endless no-flip swimming - for relaxing diving and swimming, aqua fitness and recovery exercises, as well as distance workouts for athletes.

BADU JET Turbo combines innovative technology with elegant design, and the proven BADU quality „Made in Germany“. More compact than the BADU JET Turbo Pro, but with powerful performance and flexible flow angle setting, it is suitable for swimmers of all fitness levels and for the most varied training goals.

Get what you want and make the most out of it - with BADU JET Turbo! Enjoy the cool water with your family, gently tone and strengthen your body, or gradually build up your endurance workouts. The design and features of this counter swim unit are well-thought-out, ensuring easy installation, simple operation and quiet, smooth running.

The BADU JET Turbo counter swim unit transforms your pool into a multi-purpose centre of activity, from swimming to socialising with friends and family. It is easy to use, quiet and reliable, making it the perfect centrepiece for any pool.

Unlock your full swimming potential with BADU JET Turbo Pro - your ideal training partner to refine your techniques, challenge your limits and help you reach new heights!

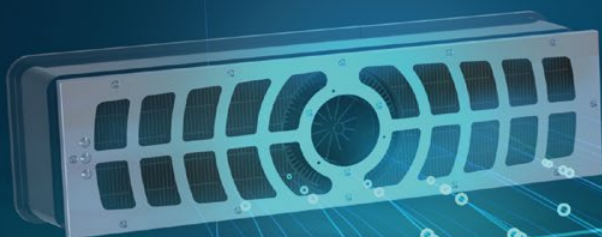

The BADU JET Turbo Pro offers all the benefits of the proven technology and meticulous, high-quality design of the JET Turbo, but is even more powerful with an incredible performance of up to 350 m³/h. Its innovative propeller technology generates a homogeneous, natural flow. BADU JET Turbo Pro brings the open water to your training sessions, within the ideal and safe environment of your pool. All demanding swimmers and athletes taking part in competitions: welcome to the limit! For enhanced safety, it is protected by electrical separation with guaranteed no contact between electrical components and the pool water.

Achieve your best performance yet! Whether you need intensive interval training, a tailor-made strength-endurance programme or technical refinement for triathlons, this counter swim unit has you covered. Personalise the look with various design options in high-quality materials and integrate it seamlessly into your pool environment. Transform your pool into a professional training ground and maximise your performance, right in your backyard, with BADU JET Turbo Pro!

Now possible: swimming with an oceanic feeling

Saltwater pools have become the latest must-have and pool water maintenance using salt water electrolysis is increasingly popular. In addition to our range of high-quality polished stainless steel panels for freshwater pools, we now offer panels for the BADU JET Turbo and Turbo Pro counter swim units that are suitable for saltwater pools. In saltwater execution, these panels are made of durable plastic in a brushed aluminium look, while the Piezo buttons and screws are corrosion-resistant and made of high-quality V5A stainless steel.

Bring some oceanic feeling to your pool!

Design & Aesthetics

Good design is not only a matter of personal taste; it is not just about what you like, it's a statement of who you are.

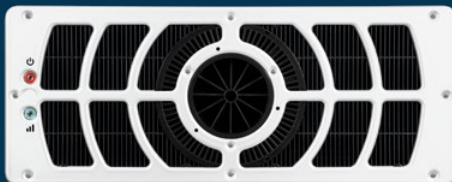

The poolside panels for the premium counter swim units BADU JET Turbo and Turbo Pro are available in two different designs. The design panels seamlessly blend into exclusive pool installations without impairing the aesthetics or reducing the usable area of the pool. For freshwater pools, the panels are made of **high-quality polished stainless steel**. For those seeking to bring an oceanic feeling to their pool, there is now a choice of panels made of **durable plastic in a brushed aluminium look**, which are especially suitable for saltwater pools.

All panels of the premium counter swim units are equipped with Piezo buttons that can be used to control the power level directly from the poolside - no need for installation work on the pool wall. Another highlight: The Piezo buttons of the BADU JET Turbo and Turbo Pro models light up in a colour that corresponds to the selected power level, so you can easily identify which of the seven available power levels has been chosen while swimming. The BADU JET Turbo Light features Piezo buttons that flash once, twice or three times, depending on the selected power level during adjustment, for an easy and straightforward operation.

The powerful premium counter swim units are the ultimate highlight in any pool. Enjoy **endless swimming** for as long as you like, **without unnecessary flip turns** - nothing is going to stop you now!

Proven Safety

The premium counter swim units BADU JET Turbo, BADU JET Turbo Pro, and BADU JET Turbo Light are not only a real highlight in terms of their design but also excel in terms of safety. They are **compliant with relevant safety standards** (DIN EN 16582-1 & DIN EN 16713-2) and are certified with the GS seal* by TÜV. They guarantee a safe and enjoyable swimming experience for all pool users, not only in private pools, but also in public pools such as hotel pools and hydrotherapy pools.

All **electrical components** of BADU JET Turbo, BADU JET Turbo Pro, and BADU JET Turbo Light are **hermetically separated from the pool water** so that no voltage enters into the pool. The sophisticated entrapment prevention design of the suction opening ensures a very low suction force, preventing hair or clothing from getting caught in the suction system.

This makes the premium **counter swim units** BADU JET Turbo, BADU JET Turbo Pro, and BADU JET Turbo Light the **safest on the market** and suitable for swimmers of all ages.

*TÜV/GS mark for certified safety for BADU JET Turbo, including the saltwater version.
TÜV/GS mark for certified safety for BADU JET Turbo Pro, including the saltwater version, and BADU JET Light: pending approval.

Maintenance & Operability

Powered by a fanless, **highly efficient permanent magnet motor**, the premium BADU JET Turbo and BADU JET Turbo Pro counter swim units excel in their **energy-efficient operation** and long service life. Contactless torque transmission to the propeller by magnetic forces of the magnetic coupling. With no continuous drive shaft and no mechanical seal, the design is **exceptionally low-wear and low-maintenance**. The motor unit can be quickly and easily swapped **without having to lower the pool water**.

The housing and pump parts of the BADU JET Turbo and Turbo Pro counter swim units are made of **technical plastic** which makes them highly corrosion-resistant. The material offers **significant weight benefits while being very robust**. It makes handling during assembly easier and considerably **reduces installation time**.

Customise the flow generated by the premium counter swim units to your liking. Use the special tool supplied to adjust the nozzle and angle of the water flow of the BADU JET Turbo and Turbo Pro **from within the pool**. It is **very easy and quick** to do, and there is **no need for any assembly work** on the system at all! Whether you are swimming breaststroke, front crawl or backstroke, you will always have the perfect conditions for your workout!

Please note:

Premium counter swim units that are already installed can be made suitable for use in saltwater pools cost-effectively and with minimal effort by using special conversion kits.

Test swim

Thinking of buying a **BADU JET premium counter swim unit** to experience the feeling of boundless space in your pool, but want to try it out first? Come and see the amazing advantages and outstanding performance for yourself - during a **free test swim on site**. Arrange your preferred date now. We are looking forward to meeting you!
